Education

MArch Architecture Part - 2 - *University of Greenwich, London, United Kingdom*

- Understood all the RIBA Plan of Work stages and created an entire document for my design project
- Created augmented visuals integrating digital overlays to illustrate design intent and technical information effectively.
- Completed a thesis on "*Anamorphosis in Architecture*", analysing geometric principles and optical strategies to generate dynamic architectural interventions.

Bachelor of Architecture - *Anant National University, Ahmedabad, India*

- Hand drafted & modelled streets of Hampi (a UNESCO world heritage site) as part of an in-depth analysis of its historic architecture.
- Gained hands-on experience working with diverse construction materials, including POP, Wood and ferrocement to develop detailed physical prototypes.
- Completed a thesis titled "*Kinetic Architecture – A Case of Mixed-Use Skyscraper*", exploring dynamic building systems and high-rise design strategies.

Work Experience

Junior Architect – *Arth Interiors, Ahmedabad, India*

(July 2021 – July 2022)

- Participated in client meetings for high-end residential projects, contributing to discussions on design proposals and project requirements
- Took initiative in mentoring new interns, providing guidance on workflows, software tools, and studio practices

Intern – *Arth Interiors, Ahmedabad, India*

(November 2020 – July 2021)

- Assisted in concept development, drafting, and detailing under senior architects' guidance
- Supported preparation of presentations, reports, and visual materials for internal and client reviews

Academic Intern – *Hemal Shah and Associates, Ahmedabad, India*

(June 2019 – December 2019)

- Produced architectural and interior drawings, floor plans, sections, bathroom details, space layouts and landscape drawings.
- Participated in a National-Level Design Competition proposing a Satara Municipal Administrative Office Building design where I contributed to the full design process from concept development to final presentation.

Workshops

Conservation and restoration of Nagaur fort, Rajasthan

- Surveyed and documented Nagaur fort's deteriorating structural and material conditions.
- Understood different restoration techniques that preserve the original character of the fort.
- Proposed adaptive reuse strategies to enhance usability while respecting historical integrity.

Documentation of a "Pol" heritage house for UNESCO

- Created detailed architectural drawings of a traditional Pol house, including plans, elevations, and sections.
- Measured and recorded intricate elements such as door and window frames, stair details, and facade ornamentation.
- Applied water level and arch-based surveying techniques to accurately document irregular and non-perpendicular surfaces.

Ferrocement Exploration

- Designed and constructed a life-sized ferrocement canopy on campus as part of a collaborative team.
- Learned material behavior, mix proportions, reinforcement methods, and curing techniques for ferrocement.

Softwares

AutoCAD | SketchUp | Revit | Adobe Suite (Ps, Ai, Id, Lr) | Lumion | Rhino | Vray
